INFO

"Großstadtangst" shout DIE PERLEN on their latest album „TELEKTROPONK!“. The perfect music for the citizens of the concrete peripherie on the edge of the wood and those near the marsh. Yeah, even in German, English and French language!

This duo offers with the shrill voice of the little young blonde female front shouter Katja Hah and the musical sense of Ferdinand Ess, quite more than only german lyrics with keyboard-computer-mixture proving different number 1 hits on mp3-platforms like mp3.com und Besonic. Anyhow we talk about the winners of an important german independent radio contest of Zündfunk and the nominated group for the Lion at the Popkomm2006.

As Support of KLEE and NACHLADER, DIE PERLEN prove that they have the right caliber like MIA, STEREO TOTAL and 2RAUMWOHNUNG! For this reason they placed some tracks on some high potential compilations like `Aufnahmestand Vol.3, 4 und 5` (ZYX).

On „TELEKTROPONK!“ the times of Nina Hagen will be revitalised with the base of Electro-Pop combined with abstract ironical word-material in German, English and French.

It is a crazy mixture of Techno, Electro, Pop and 70 year punkrock wich give THE PEARLS the unique style giving the album `Telektroponk!` it's name. They score many points. Masterly the fat groove-box-beats are combined with crusted basslines. Catchy melodies change again with shrill soundeffects. Behave, sometimes there is a trash guitar.

The request of DIE PERLEN `...mach es laut` you should perform absolutely.
