Release Date: **23. Oct. 2009**

INFO

Ambitions were yesterday!!

Kulturni Program release a further module of their lifework!!

It's called 'Electrollerball', the latest and the fourth Kulturni Program album. It has included 15 years of musical ingenuity. The electronic-alternative songs which are behind 'Electrollerball' combine in an innovative way different electronic music styles with Easy-Listening elements. These are spiked with funny and weird details which will cause mental and physical delight at the listener.

With 'Electrollerball' the authors don't aspire some awards anymore because the floor on what they stand could not be more flat. Kulturni Program do not need glory, to make interesting music. But Kulturni Program need attention in spite of numerous nominations to 'album of the year' forgone album releases. Attention for their lifework! For the fourth time there is passion with tendency to extravagant and that should be rewarded. 'Electrollerball' is an album with expression and charisma apart from embellishment and glamerous 'Jet-Set' attitudes.

For commercial use we endorse you **track 3** which is featuring Glitza Girl and Nad Mika. And for the clubfloors we endorse you **track 2** and **track 10**.
