**INFO**

Stereo de Luxe have kept you waiting for quite some time since their last release, but now right in time to bring some heat into the cold winter days we get started. In cooperation with Bungalow, the new label K.P. Productions took Stereo de Luxe under their wings. Stereo de Luxe are back! Back on vinyl and back in the clubs. With their new track "Favorite Radio" the two boys from Berlin have moved away from the funky break beats on their 2000 album "Glam-o-Rama" and transformed into a perfect pop machine with snagged jagged edges. The result of this transformation is a sunlit guitar-Pop-Electro-beat song full of bizarre samples and effects. It will hardly surprise you that the song "Favorite Radio" originated in the Mediterranean summer heat during a tour in Spain. This time, Stereo de Luxe completely left the task of putting the finishing touches to their song and giving it the ultimate dance tune to their remix producers. In the end, even Stereo Deluxe were astonished about what had been created on their foundation. The song was remixed by Ursula 1000 (NYC / 18th Street Lounge), J.J. Smoothie (Plastic Raygun, U.K.), Kulturni Program (San Francisco) and K.P. Production. And all of them saw to it that once again you will enjoy the Stereo de Luxe universe's entire range of styles: sawing rock guitars, rich house beats, electro pop melodies and bizarre samples. Please fasten your seatbelts. Ladies on the dance floor. We'll go on a turbulent journey...
